ABSTRACT

As part of its statutory duty to foster international cooperation, the National Library of Australia has produced this annotated bibliography based on a review of material published since 1968 on the Pacific Community Concept or cooperation between countries in the Pacific Basin area of Asia and Oceania. The 159 items listed cover the following subject areas: trade relations; international affairs; investment; marine, energy, and raw materials resources; foreign aid; education and training; shipping; and tourism. Books, pamphlets, articles, papers, addresses, and government publications are included. Japanese language material and bibliographies, conference proceedings, and journals entirely concerned with the Pacific Community Concept are also recorded. Preference for inclusion in the bibliography has been given to publications held by the National Library of Australia, and a location within that library is given wherever possible. Name and geographical indexes are provided. (ESR)

PREFACE

Arising from its statutory duty to foster national and international co-operation the National Library of Australia took the initiative in arranging the first International Conference of Directors of National Libraries on Resource Sharing in Asia and Oceania, which was held in Canberra in May, 1979. Several of the Conference resolutions proposed greater sharing of resources and services through improved access, by full participation in IFLA's program for Universal Availability of Publications (UAP), by making collections available for international lending and specifically by the National Library of Australia making its specially developed rapid lending and photocopying services available to libraries outside Australia.

As a first step in this direction, the Library publishes in this volume an area studies guide on the Pacific Community Concept, produced on request. The Library proposes to distribute the guide to National Libraries in the region and to seek their advice and assistance in making it more comprehensive.

G. Chandler
Director-General and
Executive Member of the Council

INTRODUCTION

The selection of items in this bibliography was based on the following criteria:

1. High relevance. An attempt was made to identify 'key items', and material of general, related or peripheral interest has been excluded.

2. Availability. Preference was given to items held by the National Library. In a few cases items which appeared to be highly relevant but not held by the Library have been listed. National Library call numbers are indicated for all items held.

3. Currency. The search was concentrated on the period from 1968, the year of the first Pacific Trade and Development Conference.

Each item held by the National Library has been examined and in most cases an annotation intended to demonstrate its relevance to the topic has been written. Where there is a significant bibliography, this has been indicated as a possible source of background references.

THE PACIFIC COMMUNITY CONCEPT-TRADE RELATIONS

1 BURNETT, A.A. & R. Australia and New Zealand relations - implications for developing South Pacific Forum countries. World Review, vol.18, no.3, Aug. 1979: 41-8.

Discusses problems associated with the NAFTA agreement and the possibility of future associations of island countries with this bilateral agreement.
